Major General C. Norman Wood, USAF  
Assistant Chief of Staff, Intelligence  
Department of the Air Force  
Washington, D. C. 20301-6111

Dear General Wood:

The recently completed FSCS Phase III study marks a milestone in SIGINT Committee work. It has been accepted by the DDCI for publication and use by the Community in planning future SIGINT capabilities. It is critical that we project our best Intelligence Community thinking into the future to assure that our intelligence collection capabilities keep pace with our changing intelligence needs and technologic change. This recently completed study makes a major contribution to that need and does so as a result of a full Community effort.

[redacted] from your organization made a significant contribution to the success of this study. His diligence and perseverance as the alternate Air Force member of both the FSCS Steering Group and the FSCS Working Group and in arranging for Air Force support for the FSCS effort were essential. I wish to recognize the professional expertise and the spirit of teamwork that were essential to the success of the study. [redacted] should be commended for a job well done.

Sincerely,

Office of the Chairman

27 June 1988

Major General C. Norman Wood, USAF  
Assistant Chief of Staff, Intelligence  
Department of the Air Force  
Washington, D. C. 20301-6111

Dear General Wood:

The recently completed FSCS Phase III study marks a milestone in SIGINT Committee work. It has been accepted by the DDCI for use by the Intelligence Community in planning future SIGINT capabilities. As such it represents a significant accomplishment as we strive to assure future collection capabilities in an era of increasing intelligence needs and changing technology.

Many Air Force personnel made valuable contributions to this study. Their efforts in representing the US Air Force were important not only to the results of the study but also in fostering a spirit of cooperation throughout the SIGINT community.

The personnel listed in the enclosure are to be commended for their work in supporting the study, in developing and coordinating the FSCS tasks, in playing key leadership roles on the FSCS Utility Assessment Team (UAT) effort, and in conducting the driving factors analysis and generation of initiatives. Without their personal initiative, substantive background, and professional expertise this study could not have been done.

Sincerely,

Enclosure:  
as stated
